

AFTER-SALES SERVICE

DEPENDABILITY FOR YOUR STOPA STORAGE SYSTEM

Increase the dependability of your production facility by acquiring a package of spare parts and wear parts that is tailored to your storage system. If you operate more than one shift per day, we recommend keeping critical parts on hand so that any downtimes of your STOPA warehouse are minimised. When additional machines are connected, ensuring a steady flow of material is all the more important. In this way you can protect yourself from shift cancellations caused by production shutdowns or an interruption of the material flow.

EXACTLY
STOPA

10 IMPORTANT REASONS FOR YOUR PACKAGE

- 1** You have shorter downtimes because critical parts are already available on site
- 2** The packages are customised to meet your needs
- 3** With a Classic maintenance contract you get a 10% discount when you order your package
- 4** The package makes very good sense for countries with special customs regulations or long delivery times
- 5** If your system runs at full capacity (24/7), you can remedy downtimes immediately, even on weekends
- 6** Thanks to the supply of spare parts in your package, you don't have to pay for courier services
- 7** STOPA article numbers make it easy to reorder spare parts
- 8** When you have a supply of parts on site, it is easier to allocate them to the correct locations
- 9** The package can be extended even after delivery if your situation changes
- 10** The spare parts package includes documentation of installation locations, prices, article numbers and risks to production in case of downtime
