OUR STORAGE SYSTEMS**

L E V E L

THE COMPANY

OVER 2,000 STORAGE SYSTEMS INSTALLED WORLDWIDE

STOPA is a leading manufacturer of automated storage systems for sheet material and long-span goods in Europe. The product line ranges from stand-alone applications to integrated automated modules. With 50 years of practical experience, including the installation of complex plants, and more than 2,000 systems installed worldwide, this independent company possesses unique know-how with regards to product quality and process security, process automatization, and software development.

With STOPA storage systems, our customers can enjoy reliable material provisioning with high technical availability and significantly reduced search times, shorter equipping times, lower costs, and lower accident hazard due to ergonomic handling.

STOPA possesses a unique degree of know-how in the automated linkage of sheet metal processing machines, with proprietary software for the automated sequencing of processes. Interfaces to numerous well-known machine tools and installations simplify individual adjustment while at the same time reducing switching and equipping times.

STOPA NEXT LEVEL – YOUR ADVANTAGES

The development of automatic storage and supply systems is STOPA's core business. Around this core, we develop tools to provide you with comprehensive service and thus unlimited options to utilize your storage systems more intelligently and efficiently. With STOPA NEXT LEVEL, we make a lot of things simpler, faster, more automatic, and more direct. We integrate the systems, offer rail-less transportation solutions, provide support independent of time or location, and are thus your close partner.

Join with STOPA to get to the NEXT LEVEL and integrate future-oriented technology so that your complex logistics systems operate efficiently – always and everywhere.

AUTONOMOUS TRANSPORT SYSTEM

NEW FREEDOMS AND FLEXIBILITY WITH VARIOCART

Boost the efficiency of your production and enjoy new freedoms and flexibility with the new, intelligent VARIOCART transport system.

We have been supporting our customers in the customisation of their sheet metal storage design for many years, enabling highly efficient storage logistics with our premium automated storage systems.

Follow us to the next level! By linking different production machines without rails, we are opening up new dimensions of sheet metal storage logistics. Limitations with regard to the positioning of machines or in the material flow are now a thing of the past. Rails? No longer needed. The new VARIOCART transport system moves freely and without rails, recognises obstacles and connects all conceivable stations in a fully automatic sheet metal store.

OFF THE RAILS!
MORE FLEXIBILITY
EVEN MORE EFFICIENCY.

CONTROLS

THE APP FOR THE STOPA SYSTEM

FOR THE COMPREHENSIVE FLOW OF INFORMATION IN AN INDUSTRY 4.0 ENVIRONMENT

With STOPA app CONTROLS, the people involved in the flow of materials are always “in the know.” That is because error messages in the warehouse are automatically sent to their smartphone. The app shows where the fault can be found, thus minimizing search times and significantly reducing downtime in production.

Furthermore, CONTROLS helps the plant operator in sending a predefined, menu-guided problem description to STOPA Customer Service – supplemented with photos and videos. The customer can assign different priorities to different problems. With an easily-understood user interface and individually-adjustable functions, the app helps you help yourself. The overall time frame for rectifying faults is minimized.

THE STOPA APP FOR EVEN MORE PRODUCTION RELIABILITY.

IRIS

VISUAL SUPPORT USING DATA GLASSES

AUGMENTED SUPPORT – CUSTOMER PROXIMITY IS NOT A QUESTION OF GEOGRAPHIC DISTANCE

IRIS data glasses make it possible to provide realistic, reliable technical service at a distance. With IRIS, STOPA can support not only its own service personnel performing on-site maintenance work, but also enable customers all over the world to correct faults or carry out maintenance work using a remote solution.

STOPA offers this service separately or in direct combination with the delivery of new storage systems.

IRIS CAN
BE CONTROLLED
INTUITIVELY
VIA A TOUCHPAD
OR VERBALLY.

In cooperation with Essert GmbH

Be the first to profit from IRIS and become a Stopa system expert. We will be happy to advise you!

STOPA ON-SITE SERVICE

WITH THE TOP EXPERTS AT YOUR SIDE.
AT STOPA, CLOSE CUSTOMER SUPPORT IS NOT
JUST A SLOGAN – IT'S A REALITY

The goal of STOPA experts is to optimize your production processes. They analyse your needs and give you best-practice recommendations all the way up to production monitoring. By means of preventive maintenance and recommendations for plant modernization, they pave the way for smooth, fault-free operation.

We want you to always be confident that you have our top experts at your side. That's why we are investing even more to be able to provide you with nearby customer support. We are establishing stations for STOPA NEARBY customer service at six additional sites in Germany. This will boost our presence and guarantee shorter response-times in Germany and neighbouring countries. We will also set up additional sites for Italy and Austria.

WE HAVE A TRUSTED
TEAM AT EACH
SITE, CAPABLE OF
RAPIDLY RESPONDING TO
YOUR CHALLENGES.

—— FUTURE PLANS

- Post Codes 84 Bavaria + Austria, Czech Republic
- Post Codes 47 + The Netherlands
- Service partners → Northern Europe + New Federal States of Germany
- South Tyrol → Italy and Austria

THREE REASONS FOR CHOOSING STOPA

1 INDIVIDUAL SOLUTIONS

STOPA solutions are tailored to specific requirements and individual customer wishes. Thanks to our expertise, you are guaranteed a smooth adaption to your special storage and material provisioning concept. For more planning reliability and future security.

2 INTELLIGENT AUTOMATIZATION

More than 2,000 systems installed worldwide – that's where STOPA gets its unique know-how in the automatization of intralogistic processes. A proprietary software platform provides interfaces to machine tools and plants.

3 WE'RE ALWAYS THERE FOR YOU

The STOPA experts are always there at your side. From the analysis of needs, to Best-Practice recommendations, all the way up to going live with the installations, preventive maintenance, and modernization. You thus are assured of having the most-qualified partner there to support you.
